

# 86 No-More Documentation:

## APPLICATION USER REFERENCE:

With its state-of-the-art inventory tracker, 86-No-More is a culinary revolution that says goodbye to the sadness of unavailable menu items. It predicts ingredient shortages with ease, giving managers access to analytical information, cutting down on waste, and increasing revenue. Take advantage of innovation, do away with shortages, and enjoy the flavor of more profitable and sustained restaurant success with 86-No-More!" With this app, you can:

Sign Up and Login Screen - Sign up for an account on 86-no-more

Delete and Add Items to the Menu

Adding, editing, and removing things from the inventory

Notify recipients when an ingredient is running low or expires.

forecasts the stock by using historical usage data.

Make your inventory visually appealing by using graphs

## What's New??

- Isolated Display Menu from the add Menu form
- Implemented the add to Cart functionality and payment option
- Implemented Functionalities to add the metrics
- Display the ingredients or information about what the product contains, such as Chicken, Pork, Beef or Vegan etc
- Sending Expiry alerts and notifications to email
- Enhanced the User Interface and Dashboard
- Customer Feedback in the form of ratings on Menu Items
- Awareness for Food Wastage to both employees and customers.

## Some Common Issues that you might typically face while using the project:

1. Make sure to run npm install before running npm start to run the application while the first time. Otherwise we might get a Module-not-found issue.

```
kingDirectory\86-no-more-backend>npm start

> caloriesapp@1.0.0 start
> nodemon index.js

[nodemon] 3.0.1
[nodemon] to restart at any time, enter `rs`
[nodemon] watching path(s): *.*
[nodemon] watching extensions: js,mjs,cjs,json
[nodemon] starting `node index.js`
node:internal/modules/cjs/loader:1080
  throw err;
  ^

Error: Cannot find module 'express'
